12th Annual Department of Pediatrics Neonatal Symposium: Improving Care and Outcomes for the High-Risk Preterm Infant

Thursday, October 26, 2017

8:00 am-12:45 pm

NewYork-Presbyterian Queens

Theresa and Eugene M. Lang Center
for Research and Education-Auditorium
56-45 Main Street, Flushing, NY

STATEMENT OF NEED

An extremely low birth weight baby (ELBW) born very prematurely and weighing between 401 and 1000 grams at birth is at the lower limits of viability. Diagnosis and treatment remain very difficult and challenging. Providers require updates on current recommendations and advances in management in order to further optimal patient outcomes. This 12th Annual NewYork-Presbyterian Queens Department of Pediatrics Neonatal Symposium will present new recommendations for stabilization of the ELBW infant in the delivery room, genetic causes of birth defects, evidence-based medicine contributing to standards of care, management of necrotizing enterocolitis (NEC), and considerations surrounding the use of donor milk in the Neonatal ICU. Participants will have the opportunity to interact with leaders in newborn medicine and to review current and important neonatal and perinatal topics of interest.

TARGET AUDIENCE

Neonatologists, pediatricians, obstetricians, neonatal nurse practitioners, neonatal nurses, OB physician assistants, neonatal physician assistants.

EDUCATIONAL OBJECTIVES

It is intended that this NYP Queens CME activity will lead to improved patient care. At the conclusion of this symposium, the participant will be able to:

- Discuss genetic diagnosis of birth defects.
- Review evidence-based medicine contributing to standards of care in Neonatology.
- Interpret and reflect upon the most recent literature on NEC with an expert in this rapidly advancing field.
- Discuss considerations for use of donor milk in NICU.

Registration | Information
